

## Mohammad Mahdi Farahani – 400170341 – user story

- 1) As a repository keeper, I want to add books so that everyone can buy them.
- 2) As a user I want to see a filtered list of books in the repository so that I can find the books I want/need.
- 3) As a user I want to charge my account so that I can pay for the books I want to buy.
- 4) As a user I want to see some pieces of information about a book so that I can decide on to buy it or not.
- 5) As a user I want to add some books to my basket so that I can buy books I want all at once (not one by one).
- 6) As a user I want to buy the books in my basket so that I can get them.
- 7) As a user I want to see a filtered list of books that I have bought before so that I see the history of my purchases.
- 8) As a repository keeper, I want to see a filtered list of purchases so that I know what person gets what book.
- 9) As a user I don't want the books to get sold while they are in my basket so that I have time to add other books to my basket and buy all of them at once.
- 10) As a user I want to update my profile so that when my information(ex. phone number) has changed I inform the database about that.
